Lloyd's Register Book

This publication is comprised of the Register of Ships, the List of Shipowners, and the Appendix, which are issued annually in July, August, and January respectively.

The **Register of Ships** (in two volumes A–L and M–Z) contains the names, classes and general information concerning the ships classed by Lloyd's Register of Shipping (including the British Corporation Register); also particulars of all known ocean-going merchant ships in the world, of 100 tons gross and upwards.

The second volume (M–Z) also contains ship-borne barges, docking installations, liquefied gas carriers, refrigerated cargo installations, refrigerated cargo containers, refrigerated stores and container terminals classed with Lloyd's Register, and off-shore units.

The Register is kept up to date by means of cumulative monthly Supplements containing changes of name, ownership, flag, tonnage, etc, for all ships, together with a cumulative list of new ships not recorded in the Register itself. A separate monthly and cumulative Classification Survey Dates Supplement containing the latest survey records for all Lloyd's Register classed ships is available if required.

A **Weekly List of Alterations** in the Register of Ships is also published.

The **List of Shipowners** contains a list of owners and managers of the ships recorded in the Register with their fleets as well as lists of former names of ships and compound names of ships.

The **Appendix** contains lists of shipbuilders with existing ships they have built; marine enginebuilders and boilermakers; dry and wet docks; telegraphic addresses and codes used by shipping firms; marine insurance companies and marine associations.

Statistical Tables are issued gratis to subscribers to the Register Book.

Editorial changes in the 1975-76 Register of Ships

All individual items of ship data published in the previous edition of the Register have been retained, and the following *additional or revised* information is now incorporated within the ship entries as applicable:

Ship type (Column 6)
This information has been expanded. The **bold** lettering on the top line indicates the basic type of ship; the second line defines in more detail the known specific function of the ship.

Machinery aft (Column 6)
When the Engine Room notation (ER) follows the details of holds/tanks and/or hatchways, this indicates that the machinery is fitted aft. In these instances the term 'Mchy. aft' is no longer published.

Horsepower (Column 7)
In all cases where a horsepower is published, it is preceded by the equivalent Système International measurement of kilowatts.

Pressure (Columns 4 and 7)
In all cases where a pressure is published, it is preceded by the equivalent Système International measurement of megapascals. For further information, see Key to the Register of Ships.

Auxiliary generators (Column 7)
The frequency of these generators is now published in Hertz (Hz), instead of cycles (c/s).

Metrication

Following the introduction of metrication within the United Kingdom, and for the convenience of the majority of shipping interests throughout the world, the data within the Register is presented in metric units. There are exceptions to this new procedure which relate to the following items:

Equipment letter
For an *existing ship* classed with Lloyd's Register, the diameter of the chain cable on the ship (recorded in Column 4) is still shown in inches.
For *future ships* the diameter of the cable will be given in millimetres.

Water ballast
For an *existing ship* classed with Lloyd's Register, the figure (recorded in Column 5) is generally given in tons of 2240 lb, where the abbreviation used is 't'.
For some ships recently classed, however, the water ballast is shown in tonnes (abbreviation 'T') and this will, in future, be recorded for all new classed ships entered in the Register.

Containers
The lengths of containers (recorded in Column 6), will continue to be shown in feet.

Abbreviations and Conversion Table

A plastic card displaying alphabetically all abbreviations used in the Register, together with a conversion table from metric to imperial units, is provided with this edition.

Column Headers

Plastic headers in eight languages, to assist in reading particulars of a ship in the Register, will be found inside the front cover of each volume.

Alphabetical order of ships

Some minor alterations have been introduced to the alphabetical order of listing ships as formerly used in the Register. Most of the ships concerned are covered by the following:

Ships' names commencing with an *abbreviation of a word*, e.g. DR. (Doctor) or ST. (Saint), are to be found listed in strict alphabetical order *immediately before* other ships whose names commence with the letters DRA or STA respectively.

Ships' names commencing with an *initial(s)*, e.g. A. M. CAMPBELL or J. A. KRUGER, are listed at the *beginning* of the respective letter of the alphabet, as in previous editions.

Ships' names commencing with a *Roman numera* are listed under the letter of the numeral, e.g. XX ANIVERSARIO appears under letter X.

Ships' names commencing with an *Arabic numeral* are listed in a separate section immediately following letter Z.

Monthly Supplement

The monthly list of New Entries and the Supplement are both the subject of major changes.

The monthly list of New Entries will now be issued on a cumulative basis in the same way as the Supplement has been for many years.

Both of these monthly updating lists will be bound together to form a single publication. Directions for using this monthly publication are given inside the Supplement.

The seven-figured number printed in **bold type** is used for automatic data processing, and will remain unchanged during the life of the ship.

Call sign
Assigned by the Authority with which the ship is registered.

Official no.
The number assigned by the registration authority.

RTm	Radio-telephone (medium frequency)
RTh	Radio-telephone (high frequency)
RTv	Radio-telephone (very high frequency)

2

Former names
The figures following the former name of a ship indicate the year in which the change of name occurred. Former names are retained in the Register throughout the life of the ship, and an index to these names is included in the List of Owners volume.

Owners
The registered owners are recorded in **bold type.**

Managers
The managers of the ship are recorded if desired.

Port of Registry
A port printed in *italic type* is the home port of a ship and is shown where there is no known port of registry.

Flag
Indicates where the ship is officially registered.

3 (TONS)

Gross tonnage
The gross tonnage printed in **bold type** is measured according to the regulations of the Authority with which the ship is registered.

This measurement is, broadly, the capacity in cubic feet of the spaces within the hull, and of the enclosed spaces above the deck available for cargo, stores, passengers and crew, with certain exceptions, divided by 100. Thus 100 cubic feet of capacity is equivalent to 1 gross ton.

Net tonnage
Derived from the gross tonnage by deducting spaces used for the accommodation of the master, officers, crew, navigation, propelling machinery and fuel.

Where gross and net tonnages are printed in *italic type*, this indicates that although the ship is not sailing under the British flag the tonnages have been measured in accordance with British regulations.

Deadweight
The weight in tonnes (2205 lb) of cargo, stores, fuel, passengers and crew carried by the ship when loaded to her maximum summer loadline.

Shelter deck ships
OSD/CSD in column 6 indicates that the ship is a shelter-decker having arrangements for facilitating ready conversion from the open to the closed shelter deck condition or vice-versa. In the open condition the greater part of the upper 'tween-decks space is exempt and not included in the tonnage; in the closed condition the upper 'tween-decks space is included and consequently the tonnages in the CSD condition are greater than in the OSD. When available, tonnages for both conditions are recorded in the Register, the lower (OSD) tonnages printed above the greater (CSD) tonnages.

T.Mk (Tonnage Mark)
T.Mk in column 3 indicates that the ship has a Tonnage Mark painted, in addition to the Load Line marks, on each side of the ship aft of the Load Line Disc. In its simplest form the Tonnage Mark is a horizontal line with an equilateral triangle standing vertex down on it.

In cases of this kind when two sets of tonnages are recorded the set of smaller tonnages applies when the ship is not loaded beyond the draught indicated by the horizontal line of the Tonnage Mark, and the set of greater tonnages applies when the ship is loaded deeper than that draught; the Load Line Disc is positioned higher on the ship's sides than the Tonnage Mark. The difference between the two sets of tonnages is in accordance with amended Tonnage Regulations now in force for some countries under which tonnages may be measured either excluding the greater part of the upper 'tween-decks space even without a tonnage hatch in the upper deck, or including the upper 'tween-decks space.

In other cases only one set of tonnages is recorded. In these the horizontal line of the Tonnage Mark on the ship's sides is level with the deepest load line; the ship may not therefore load beyond the draught indicated by the horizontal line of the Tonnage Mark. The tonnage is exclusive of the greater part of the upper 'tween-decks space and the draught is less than the maximum allowed under the Load Line Convention.

Ore/Oil carriers
Two gross and two net tonnages are also recorded, when available, for a ship which is designed to carry either ore or oil cargoes.

If, by reason of the ship's service, normal equipment is considered to be unnecessary, the figure **1** may be omitted from the character of classification.
–	This sign in the position usually occupied by the figure **1** indicates that the equipment of the ship is not in accordance with the full tabulated requirements, but is acceptable for the particular service.
with freeboard with fbd	Signifies that the freeboard assigned is a condition of the ship's class. The scantlings of ships built since 1949 are based upon a specified draught and this notation is no longer assigned.

Descriptions and abbreviations used in classification notations

Short international voyage: This expression means an international voyage in the course of which a ship is not more than 200 nautical miles from a port or place in which the passengers and crew could be placed in safety, and which does not exceed 600 nautical miles in length between the last port of call in the country in which the voyage begins and the final port of destination.

Restricted service: This notation means that the ship is intended to operate in estuaries, harbours and/or adjacent waters, and also outside sheltered water but only for short distances (generally less than 15 nautical miles) and in reasonable weather. 'Sheltered water' and 'reasonable weather' are defined in the Society's Classification Regulations.

Protected waters service: This notation means that the ship is intended to operate only within the protected waters of harbours, rivers, lakes and sheltered estuaries having a fetch of 6 nautical miles or less.

ND (Notional Density): This is defined as the weight of cargo to be stowed in the particular compartment divided by the volume of that compartment (excluding hatchway). It should be noted that when the cargo does not completely fill the hold the notional density will be less than the actual density of the cargo itself.

Strengthened for heavy (or ore) cargoes: These notations indicate that the scantlings and arrangements have been approved for the carriage of heavy cargoes. For this purpose, a notional density of 1.43 tonne/m³ (0·04 ton/ft³) is taken as the demarcation between ore cargoes and heavy cargoes. These notations are no longer assigned.

a b† c*, etc.	Equipment Letters previously determined by the Society's Rules, but no longer assigned. The diameter of the chain cable is recorded only when it differs from that corresponding to the Equipment Letter or when it is of special quality steel. The diameter is also recorded when wrought iron chain cable of Grade 1a is fitted and this is qualified by the letters 'WI'.
(a) (b†) (c*), etc.	The letters in parentheses are employed to determine the fees for Special Surveys on the hull and are not Equipment Letters. If there is no letter in parentheses, the Equipment Letter is to be used for determining the fee for a Special Survey of the hull.

5 (HULL)

Following the conversion of imperial to metric units it is possible that measurements can be inaccurate by up to 10 millimetres in this edition.

Date of build

For a ship built under the supervision of Lloyd's Register surveyors, the year and month recorded indicate the date of completion of the Special Survey during construction.

When there has been an unduly long interval between the launching and the completion or commissioning of the ship two dates are recorded prefixed by Lch. and Cmpl. or Cmd. The abbreviation Recmd means recommissioned.

Shipbuilders and place of build

This normally records the shipyard where the hull of the ship was built. When it is known that major sections of the hull have been constructed by other builders, their names are also recorded, but the entry of a single builder's name in no way implies that all of the hull has been fabricated in that yard.

Overall length

The extreme length of the ship.

Bulbous bow (BB) : When the extreme length is followed by the notation (BB) this indicates that the ship has a bulbous bow and the overall length recorded includes any protrusion of that bow.

Registered length

If the extreme length is not available, the registered length as given on the ship's Certificate of Registry, is recorded in *italics*, thus *124,62*

Length B.P. (between perpendiculars)

The distance on the summer load waterline from the fore side of the stem to the after side of the rudder post, or to the centre of the rudder stock if there is no rudder post.

Extreme breadth

The extreme breadth is the maximum breadth to the outside of the ship's structure and in paddle ships includes the paddle boxes.

Moulded breadth

The moulded breadth is the greatest breadth at amidships from heel of frame to heel of frame.

Maximum draught

In most cases this is the maximum summer draught amidships, but in some ships of special construction the maximum draught is at the after end, and this figure is recorded.

FW (fresh water) : For ships employed on the Great Lakes and rivers, whose freeboards are assigned by Lloyd's Register, the summer draught in fresh water is inserted followed by the letters FW.

OSD/CSD ships : For such ships, as indicated in column 6, the summer draught in the open condition is recorded, followed by the draught in the closed condition.

Ships assigned tonnage marks : For ships to which tonnage marks have been assigned, as indicated in column 3, the draughts recorded are those at the tonnage mark and the summer (maximum) load line respectively.

Description of ship

Unless otherwise stated, ships are of steel construction. Where higher tensile steel is extensively used in the main hull structure of a ship classed with Lloyd's Register, a suitable note is inserted below the description of the ship.

The description of the ship given in this column is not a Lloyd's Register classification notation. The information published in bold type on the first line indicates the basic type of the ship: the second line defines in more detail the known specific function of the ship. This information is obtained from any source which is believed to be reliable.

For the purpose of the Register (1) a Bulk Carrier is a general purpose single deck dry cargo ship of over 10,000 tonnes deadweight with machinery aft and generally with hopper side tanks and topside tanks in the holds (2) a Container Ship, or part Container Ship, is one specially fitted for the carriage of containers in one or more holds with large hatchways or with two or more hatchways abreast and fixed or portable guides to house the containers.

Aux	Auxiliary (sailing ship with auxiliary machinery)
D-E	Diesel-electric
GT	Gas turbine
GT-E	Gas turbo-electric
M	Motorship
P	Paddle
Q	Quadruple screw
S	Steamship
T	Twin screw

Tr	Triple screw
Comp	Composite construction
Ref	Ship fitted with refrigerated cargo installation
CSD	Closed shelter deck ship
OSD	Open shelter deck ship
OSD/CSD	A shelter deck ship which has arrangements for both the open and closed condition. (See note under Tonnages Column 3).
Mchy.aft	Machinery aft
Mchy.fwd	Machinery forward
Ice strengthened	This indicates that *at the time of construction* the ship was assigned an ice classification notation by a Classification Society. However, in the case of a ship *at present holding* the classification of Lloyd's Register, any valid ice classification notation assigned by this Society is instead recorded in column 4.

When the position of the Engine Room notation (ER) follows the details of tanks, holds and/or hatchways, this indicates the machinery is fitted aft. In these instances the term 'Mchy.aft' is not published.

Number of passengers

The maximum number of passengers, as reported by the owners, is recorded thus: (30P).

In some cases the number of berths (bth) and deck passengers (dkP) are recorded separately.

Holds

Where possible, hold lengths are given in order, commencing at No. 1 from forward

B.	Bale capacity in cubic metres. The capacity of cargo spaces, measured to inside of cargo battens, to top of ceiling and to underside of beams, including hatchways. (Insulated spaces are not included). For a part Container Ship the figure does not include spaces allocated to containers.
In	Insulated capacity in cubic metres. Bale capacity of the insulated spaces in ships having refrigerated cargo installations. It is measured from the face of overhead, 'tween deck and tank top insulation lining, or the surface of 'tween decks where uninsulated; or from the face of brine pipes or air ducts; from the face of permanent cargo battens or air screens or air coolers or casings. Deductions are made for floor gratings, which are part of the air circulation system, for pillars, stanchions and other fixtures which interfere with the cargo-carrying capacity, but not for loose or portable floor dunnage, or for portable bins or trays and their supports. The insulated spaces are not included in the grain and bale capacities.

Containers

For a Container or part Container Ship the following information is recorded and is given by the owner or is obtained from other sources which are believed to be reliable.

C.	Total carrying capacity in number and length(s) of containers. This information is only recorded when the separate numbers of containers carried in holds and those on deck are not available. This total capacity is also shown for a Lighter Carrier.
C.Dk	Carrying capacity in number and length(s) of containers on deck.

Where two hatchways can be combined to form one large hatchway, only the combined size is given, and the two hatchways counted as one. The total length is followed by the abbreviation 'comb'. The material of hatch covers is recorded when known.
